

Statement of teaching values and outcomes

At Weybridge International School of English (WISE) we provide a fun, multi-cultured multi-cultural and energetic learning environment where the English language is used to communicate.

WISE offers a range of levels and courses for students who want to improve their English. We provide the following types of courses*: General English, Business English, Exam preparation classes (Cambridge & IELTS) and Conversation classes.

*definition of courses at WISE: This refers to classes (groups) or lessons (private one-to-one)

Our teachers

All of our courses are taught by highly professional and qualified teachers who understand the need to cater for different learning styles.

The materials

We try to ensure all of our courses are relevant, interesting and practical to our student's needs and interests.

We use a variety of materials on each course. Although the course book is the main resource, teachers also use a variety of everyday materials which incite discussion and which promote British culture and the core British Values.

Each course

Together with the course material, our teachers also provide students with skills that promote independent learning and which direct students to language learning outside the classroom.

The students

We ask that our students take joint responsibility with their teachers to achieve their learning goals and outcomes.

Progress

We monitor our student's progress closely as we believe that it is important for students to see progression during their time with us. For this reason, all students are asked to complete an entrance test, monthly progress tests and an exit test.

Feedback

Student feedback is paramount to us. We therefore ask students for their feedback at the beginning of each course, at the end of each term and on their departure date. We always try to acknowledge and deal with our weaknesses or causes for concern.

Academic support

Our teachers and academic manager are available to support all students with their goals and academic targets. For students wishing to progress onto mainstream education in the UK, information can be provided.

Welfare support

Any student that has a concern can approach any member of staff or our Welfare Officer, Amanda Thorogood.

After WISE

We always encourage our students to continue with their learning upon completion of their course at WISE.
